Features

- Heavy-duty steel construction
- Designed for supporting long bars and shafts
- Strong and stable base
- High load-bearing capacity
- Helps prevent material bending and rolling
- Suitable for pipes, rods, shafts, and bars
- Compact and practical workshop design
- Easy loading and unloading
- Suitable for industrial and workshop environments
- Available in different sizes and configurations (Model Dependent)

Specifications

Name	BAR STAND
Approx weight	8

Description

Overview

The Bar Stand is a heavy-duty machine-shop accessory designed to support and store long metal bars, shafts, rods, pipes, and other cylindrical materials in a safe and organized manner. It helps prevent long materials from bending, rolling, or falling while keeping them readily accessible for machining and fabrication operations.

Common Uses

The Banka Bar Stand is widely used for supporting and organizing long bars, rods, shafts, pipes, and other cylindrical materials in lathe workshops, CNC machine shops, fabrication units, production floors, material storage areas, and engineering facilities. It is especially useful where stable material support, safe storage, easy loading and unloading, reduced material bending, improved workshop organization, and reliable heavy-duty performance are essential.
