Features

- Precision-engineered C-Clamp
- Heavy-duty C-shaped frame
- High-strength forged steel / ductile steel construction
- Strong threaded screw mechanism

- Swivel pad for improved workpiece contact
- High clamping force with controlled adjustment
- Heat-treated components for enhanced durability
- Ergonomic handle for easy operation
- Corrosion-resistant surface finish
- Available in various sizes and throat capacities (Model Dependent)

Description

Overview

The C-Clamps are heavy-duty workholding tools designed to securely clamp and hold workpieces during fabrication, welding, machining, assembly, fitting, and repair operations. Their C-shaped frame provides excellent access around the workpiece, while the threaded screw mechanism delivers strong and controlled clamping force.

Common Uses

The Banka C-Clamps are widely used for securely holding, positioning, and clamping workpieces during welding, fabrication, machining, drilling, assembly, fitting, and repair operations. They are essential workholding tools for machine shops, fabrication workshops, welding units, automotive industries, maintenance departments, construction sites, tool rooms, and precision engineering facilities, where strong clamping force, rigid workpiece support, easy adjustment, and reliable performance are essential for efficient industrial and workshop operations.
