Description

Overview

The Compound Sliding Table 300 × 200 mm is a precision machine-tool accessory designed to provide controlled longitudinal and crosswise movement of workpieces or fixtures during drilling, milling, routing, and other machining operations. Its two-axis sliding mechanism allows accurate positioning along both directions, making it ideal for precision workholding and machine setup.

Common Uses

The Banka Compound Sliding Table 300 × 200 mm is widely used for accurate positioning and controlled movement of workpieces and fixtures during milling, drilling, slotting, grooving, machining, and precision setup operations. It is an essential machine accessory for milling machines, drilling machines, bench machines, tool rooms, fabrication workshops, maintenance departments, educational institutes, and precision engineering facilities, where smooth two-axis movement, accurate positioning, and stable workholding are essential for producing precise components.
