Description

Overview

The Cutting Tools are precision-engineered tools used for removing material from workpieces through controlled machining operations such as turning, milling, drilling, threading, reaming, grooving, and parting. Cutting tools may be single-point or multi-point, depending on the machining process and tool design.

Common Uses

The Banka Cutting Tools are widely used for turning, milling, drilling, reaming, boring, threading, grooving, parting, profiling, and finishing operations on a wide range of engineering materials. They are essential tools for machine shops, CNC machining centers, CNC lathes, production workshops, tool rooms, automotive industries, fabrication units, and precision engineering facilities, where accurate material removal, dimensional control, excellent surface finish, productivity, and reliable tool life are essential.
