Description

Overview

The Degree Protractor is a precision measuring instrument designed for accurately measuring, setting, and transferring angles in machining, fabrication, inspection, and engineering applications. Manufactured from high-quality hardened stainless steel, it provides excellent durability, corrosion resistance, and precise angle measurement. Its clear graduations and smooth adjustment mechanism make it an essential tool for workshops, tool rooms, and quality inspection departments.

Common Uses

The Banka Degree Protractor is widely used for measuring, setting, and transferring angles during machining, fabrication, welding, inspection, tool setup, and layout operations. It is an essential measuring instrument for machine shops, tool rooms, quality control departments, fabrication workshops, automotive industries, educational institutes, and precision engineering facilities, where accurate angle measurement and consistent alignment are critical for achieving high-quality manufacturing results.
