Features

- Precision-engineered Dog Chuck
- Positive workpiece driving arrangement
- Secure and rigid workholding
- Suitable for turning between centres
- Robust cast iron / steel construction

- Precision-machined components
- Excellent gripping and driving performance
- Suitable for cylindrical workpieces
- Easy workpiece mounting and removal
- Available in different sizes (Model Dependent)

Description

Overview

The Dog Chuck is a precision lathe workholding accessory designed for securely gripping and driving workpieces during turning operations, particularly when machining between centres. Its dog-drive arrangement allows positive transmission of rotational force from the lathe spindle to the workpiece.

Common Uses

The Banka Dog Chuck is widely used for securely driving and holding cylindrical workpieces during turning between centres, including shaft machining, facing, threading, taper turning, and other precision lathe operations. It is an essential workholding accessory for centre lathes, production workshops, machine shops, tool rooms, automotive industries, and precision engineering facilities, where positive workpiece drive, secure clamping, accurate rotation, rigid support, and reliable machining performance are essential.
