Description

Overview

The Drill Chuck Arbour is a precision-engineered machine tool accessory designed to connect a drill chuck to a compatible machine spindle or tool holder. It provides a secure mounting interface for holding drill chucks during drilling and other suitable machining operations.

Common Uses

The Drill Chuck Arbour is commonly used to mount a drill chuck onto a compatible machine spindle or tool holder for drilling operations. It is suitable for drilling machines, milling machines, tool rooms, maintenance workshops, and industrial manufacturing facilities. Selecting the correct machine-side taper and chuck-side mounting interface is essential for proper fit, alignment, and safe operation.
