Description

Overview

The Edge Finder is a precision machine-tool accessory used to accurately locate the edge, center, or reference position of a workpiece on a milling machine or machining center. It helps establish accurate workpiece coordinates before machining, improving positioning accuracy and reducing setup errors.

Common Uses

The Banka Edge Finder is widely used for locating workpiece edges, finding center positions, and establishing accurate X-Y reference coordinates before milling, drilling, slotting, and other machining operations. It is an essential setup tool for CNC machining centers, milling machines, machine shops, tool rooms, production workshops, and precision engineering facilities, where accurate workpiece alignment, repeatable positioning, reduced setup time, and reliable machining accuracy are essential.
