Description

Overview

The ER-Collet Set is a precision tool-holding set designed for securely gripping end mills, drills, reamers, taps, and other cylindrical-shank cutting tools in compatible ER collet chucks. The set includes multiple collets covering a range of tool shank diameters, providing flexibility for different machining requirements.

Common Uses

The Banka ER-Collet Set is widely used for securely holding end mills, drills, reamers, taps, and other cylindrical-shank cutting tools in ER collet chucks during CNC milling, drilling, tapping, reaming, and precision machining operations. It is an essential tool-holding set for CNC machining centers, milling machines, production workshops, tool rooms, automotive industries, and precision engineering facilities, where multiple tool sizes, accurate tool alignment, secure gripping, low runout, and reliable machining performance are essential.
