Description

Overview

The Flanged Nuts are precision fastening components designed to securely tighten and hold bolts, studs, and clamping assemblies. The integrated flange acts like a built-in washer, helping distribute the clamping load over a larger surface area while reducing the risk of surface damage.

Common Uses

The Banka Flanged Nuts are widely used for securing T-bolts, studs, strap clamps, mould clamps, fixtures, and workholding components on machine tables and machining equipment. They are essential fastening accessories for CNC machining centers, milling machines, drilling machines, mould and die workshops, tool rooms, fabrication units, and precision engineering facilities, where secure fastening, proper load distribution, rigid workholding, and reliable clamping performance are essential.
