Features

- High-precision modular construction
- Precision-machined body for excellent accuracy
- Interchangeable modular jaws for flexible workholding
- High clamping force and excellent rigidity
- Hardened and ground working surfaces

- Smooth and precise clamping mechanism
- Compact design for efficient machine-table utilization
- Suitable for multiple workpiece configurations
- Durable construction for heavy-duty industrial use
- Designed for high repeatability and long service life

Description

Overview

The High Precision Modular Vice is a precision workholding solution designed for securely clamping and accurately positioning workpieces during milling, drilling, grinding, CNC machining, and inspection operations. Its modular construction provides flexibility for different workholding requirements, while precision-machined components ensure excellent accuracy, rigidity, and repeatability.

Common Uses

The Banka High Precision Modular Vice is widely used for securely holding and positioning workpieces during CNC milling, drilling, grinding, machining, inspection, and precision manufacturing operations. It is an essential workholding accessory for CNC machining centers, milling machines, tool rooms, production workshops, automotive industries, mold and die manufacturing, educational institutes, and precision engineering facilities, where high clamping accuracy, rigidity, repeatable positioning, and flexible workholding are essential for producing high-quality components.
