Description

Overview

This file is having one face flat and other face of curve shape. Width of the file is uniform throughout the file. Half-round file can be used for dual purposes, the flat face for filing flat surfaces and the curved face for grooves. It is available in bastard, 2nd cut and smooth cut geometry. This file is used for filing concave corners crevices, grooves and round holes. This file is used by machinists, fabricators etc. and it is ideal for use on wood, metal and plastic. It is manufactured as per IS 1931:2000, BS498:1960 & GGG- F 325 :1985

Common Uses

The Machinist File – Half Round is commonly used in engineering workshops, tool rooms, fabrication units, and maintenance departments for smoothing metal surfaces and refining curved profiles. Its half-round shape makes it suitable for working on both flat surfaces and concave areas. It is also useful for removing burrs, adjusting component shapes, and finishing machine parts before assembly.
