Description

Overview

Hand Machinist file is rectangular in cross section and having uniform width throughout the length. This file is available in bastard, 2nd cut and smooth cut geometry with one safe edge. This file is generally used for finishing flat surfaces. This file is used by machinists, machinery builders, ship and engine builders. It is ideal for use on wood, metal and plastic. It is manufactured as per IS 1931:2000, BS498:1960 & GGG- F 325 :1985

Common Uses

The Machinist File – Hand is commonly used in engineering workshops, tool rooms, fabrication units, and maintenance departments for smoothing metal surfaces, removing burrs, and adjusting component dimensions. It is useful for refining edges, fitting machine parts, and preparing components for assembly. Its practical design makes it suitable for general hand-filing and metal-finishing operations.
