Description

Overview

This file is round in cross-section and slight taper at the end. Round file is used for enlarging round holes. If one have to enlarge the holes and sharpen the curved surface, then this file is a right choice for the same. It is available in bastard, 2nd cut and smooth cut geometry. This file is used by machinists, fabricators etc. and it is ideal for use on wood, metal and plastic. It is manufactured as per IS 1931:2000, BS498:1960 & GGG- F 325 :1985

Common Uses

The Machinist File – Round is commonly used in engineering workshops, tool rooms, fabrication units, and maintenance departments for finishing round holes, smoothing cylindrical surfaces, and removing burrs from drilled components. Its round profile makes it suitable for working on internal curved surfaces and refining hole edges. It is also useful for adjusting component dimensions and finishing metal parts during fitting and assembly operations.
