Features

Head Stock: Heavy-duty box headstock design minimizes noise and displacement. Equipped with hardened 20MnCr5 gears and a precision spindle for smooth, reliable and long-lasting performance.

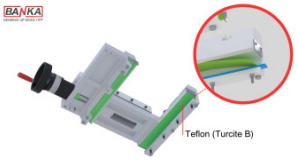

Gear Box: All gears are hardened and ground for smooth, durable performance. Wide range of feeds and threads with quick, instant selection.

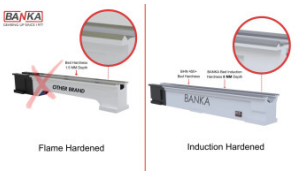

Tail Stock: Tailstock is designed with a tang shank type sleeve for rigid support during heavy-duty operations. Double locking system ensures firm clamping and vibration-free performance.

Apron: Heavy-duty apron with automatic feed control system for smooth operation. Safety release handle protects the machine and operator by instantly stopping motion during emergencies.

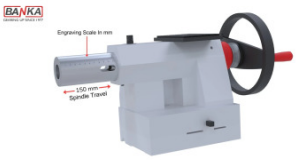

Carriage: Heavy-duty carriage with Turcite-B lining ensures smooth travel and consistent accuracy. Designed for low wear, high rigidity and extended machine life.

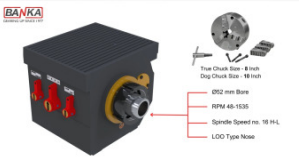

Induction Hardened Bed: 450+ BHN hardened bed provides superior rigidity and durability. Reduces wear, ensuring consistent precision over years of use.

Head Stock Inside View: Heavy-duty headstock construction ensures maximum rigidity and extended machine life.

Engraved Scale: Tailstock is provided with an engraved scale for precise measurement and easy operation. This is a unique feature not commonly available in other machines.

LOO Type: Headstock is equipped with American LOO type spindle system supported by taper roller bearings for high rigidity and precision.

Description

BANKA 43 – SHAFT TURNING LATHE MACHINE FEATURES

1. Step-by-Step Quality Control

Every lathe machine undergoes systematic manufacturing, assembly, and inspection to ensure reliable performance, accuracy, and durability.

2. Precision Flatness Inspection

Straight edges are used to check the flatness and straightness of machined surfaces, ensuring proper alignment and machining accuracy.

3. Accurate Machine Leveling

Precision spirit levels are used to check machine alignment and leveling for stable operation and consistent accuracy.

4. Bed Hardness up to 400 BHN

Machine bedways undergo a special hardening process for excellent wear resistance, rigidity, and long-lasting durability.

5. Spindle Speed & Torque Testing

Advanced tachometers and torque testing instruments verify spindle RPM and performance for smooth and efficient machining.

6. Component & Thread Accuracy

Dial indicators, micrometers, and thread testers ensure precise dimensions, tolerances, and accurate thread cutting.

7. Noise & Electrical Testing

Decibel meters and ammeters are used to inspect machine noise levels and motor performance for reliable operation.

8. Premium Grade Materials

High-quality 20MnCr5 and SAE 8620 alloy steel components undergo specialized heat treatment for superior strength and durability.

9. Advanced Machining & Assembly

Precision boring, grinding, and machining processes ensure excellent finishing, accurate dimensions, and high-quality machine assembly.

10. After-Sales Service & Maintenance

BANKA provides professional installation, maintenance, and technical support to minimize breakdowns and ensure long-term machine performance.
