Features

- Precision-engineered ISO Milling Reduction Socket
- Designed for ISO taper reduction applications
- Precision-ground internal and external taper surfaces
- High-quality alloy steel construction
- Excellent concentricity and tool alignment
- Provides secure and rigid tool mounting
- Accurate taper fit for reliable power transmission
- Heat-treated for improved strength and wear resistance

- Available in various ISO taper combinations (Model Dependent)
- Suitable for conventional and CNC milling machines

Description

Common Uses

The Banka Milling Reduction Socket (ISO) is widely used for adapting different taper sizes between ISO machine spindles and compatible milling arbors or tool holders during milling, drilling, and precision machining operations. It is an essential machine-tool accessory for CNC machining centers, milling machines, production workshops, tool rooms, machine shops, automotive industries, and precision engineering facilities, where accurate taper fitting, secure tool holding, low runout, increased tooling flexibility, and reliable machining performance are essential.
