Description

Overview

The Plain Milling Vise is a precision workholding accessory designed to securely clamp workpieces during milling, drilling, tapping, grinding, and other machining operations. Its fixed-base design provides exceptional rigidity and stability, ensuring accurate workpiece positioning and minimizing vibration during machining. Manufactured from high-quality graded cast iron with hardened and precision-ground steel components, it delivers reliable performance and long service life in demanding industrial environments.

Common Uses

The Banka Plain Milling Vise is widely used for securely holding workpieces during milling, drilling, tapping, grinding, and general machining operations on milling machines, CNC machining centers, and drilling machines. It is an essential workholding accessory for tool rooms, production workshops, automotive industries, mold and die shops, fabrication units, maintenance departments, educational institutes, and precision engineering facilities, where rigid workpiece clamping, accurate positioning, and consistent machining performance are essential for achieving high-quality manufacturing results.
