Description

Overview

The Mould Clamp is a heavy-duty workholding accessory designed to securely hold moulds, dies, fixtures, and machine components on machine tables during machining, mould making, assembly, and maintenance operations. Its robust construction provides strong clamping force and stable positioning, helping minimize movement and vibration during machining.

Common Uses

The Banka Mould Clamp is widely used for securely holding moulds, dies, fixtures, and components during milling, drilling, CNC machining, mould making, die manufacturing, assembly, and maintenance operations. It is an essential workholding accessory for mould and die workshops, CNC machining centers, machine shops, tool rooms, automotive industries, production facilities, and precision engineering applications, where strong clamping force, secure positioning, machining stability, and reliable performance are essential for producing accurate and high-quality components.
