Description

Overview

The Oil Cup is a machine lubrication accessory designed to store and supply lubricating oil to bearings, bushes, guideways, spindles, and other moving machine components. It provides a convenient method of maintaining regular lubrication and helps reduce friction, wear, and heat during machine operation.

Common Uses

The Banka Oil Cup is widely used for supplying lubricating oil to bearings, bushes, guideways, spindles, slides, and other moving machine components. It is an essential maintenance accessory for lathes, milling machines, drilling machines, grinding machines, machine tools, production workshops, maintenance departments, and engineering facilities, where regular lubrication, reduced friction, minimized wear, smooth machine movement, and reliable long-term operation are essential.
