Description

Overview

The Scriber is a precision marking tool designed for accurately scribing fine lines on metal and other engineering materials during layout, marking, fabrication, machining, and inspection operations. Its sharp hardened point produces clear and precise reference lines that remain visible during subsequent machining processes.

Common Uses

The Banka Scriber is widely used for marking fine reference lines, transferring dimensions, locating machining points, and preparing workpieces for drilling and cutting operations on metal plates, shafts, machine components, fabricated parts, and engineering materials. It is an essential layout tool for machine shops, fabrication workshops, automotive industries, maintenance departments, tool rooms, educational institutes, and precision engineering facilities, where accurate marking, precise layout, and reliable workpiece preparation are essential for high-quality machining and fabrication.
