Description

Overview

The Self-Centering Shaft Vice is a precision workholding tool designed to securely clamp and automatically center round shafts, rods, pipes, tubes, and cylindrical components. Its self-centering mechanism ensures that the workpiece remains aligned with the vice centerline, reducing setup time and improving machining accuracy.

Common Uses

The Banka Self-Centering Shaft Vice is widely used for holding and accurately centering round shafts, rods, pipes, tubes, and cylindrical workpieces during milling, drilling, tapping, grinding, inspection, and precision machining operations. It is an essential workholding accessory for machine shops, CNC machining centers, milling machines, tool rooms, automotive industries, fabrication workshops, maintenance departments, and precision engineering facilities, where automatic centering, secure clamping, accurate alignment, and repeatable machining performance are essential for producing high-quality components.
