Description

Overview

The Split Sleeve Tapping system is a precision tool-holding solution designed for securely holding taps during tapping operations. Its split-sleeve construction provides controlled gripping of the tap shank while allowing quick and convenient tool changes.

Common Uses

The Banka Split Sleeve Tapping system is widely used for holding and guiding machine taps during internal thread cutting operations on drilling machines, milling machines, CNC machining centers, and other compatible machine tools. It is an essential tapping accessory for machine shops, production workshops, automotive industries, tool rooms, maintenance departments, and precision engineering facilities, where accurate tap alignment, secure tool holding, quick tool changes, consistent thread quality, and reliable tapping performance are essential.
