Features

- Precision-engineered Square Tool Post
- Rigid and durable construction
- Secure cutting-tool clamping
- Square design for stable tool positioning
- Adjustable tool height

- Precision-machined mounting surfaces
- Easy tool installation and removal
- Suitable for various cutting tools
- Available in different sizes (Model Dependent)
- Designed for general-purpose lathe operations

Description

Overview

The Square Tool Post is a robust lathe accessory designed for securely holding and positioning cutting tools during turning, facing, threading, boring, and other machining operations. Its simple and rigid construction provides stable tool support and allows convenient adjustment of the cutting tool to the required position.

Common Uses

The Banka Square Tool Post is widely used for securely holding and positioning cutting tools during turning, facing, boring, threading, grooving, parting, and other lathe machining operations. It is an essential lathe accessory for centre lathes, workshop lathes, machine shops, tool rooms, production workshops, automotive industries, and general engineering facilities, where rigid tool holding, accurate positioning, reduced vibration, easy adjustment, and reliable machining performance are essential.
