Description

Overview

The Strap Clamp is a heavy-duty workholding accessory designed to securely hold workpieces and fixtures on milling machines, drilling machines, CNC machines, shaping machines, and machine-tool tables. Its elongated slot allows flexible positioning of the clamping bolt, making it suitable for different workpiece sizes and clamping arrangements.

Common Uses

The Banka Strap Clamp is widely used for securely clamping workpieces, fixtures, and components to machine tables during milling, drilling, shaping, boring, CNC machining, and fabrication operations. It is an essential workholding accessory for machine shops, CNC machining centers, milling machines, drilling machines, tool rooms, fabrication workshops, automotive industries, production units, and precision engineering facilities, where strong clamping force, flexible positioning, rigid workholding, and reliable machining performance are essential.
