Features

- Precision-engineered Tool Post Grinding Attachment
- Designed for mounting on a lathe tool post
- High-speed grinding spindle
- Rigid and compact construction
- Suitable for cylindrical and surface grinding

- High-speed motor for efficient grinding
- Smooth and stable operation
- Easy mounting and positioning
- Suitable for grinding wheels of various sizes (Model Dependent)
- Designed for industrial and workshop applications

Description

Overview

The Tool Post Grinding Attachment is a precision machine-tool accessory designed for grinding, sharpening, and finishing workpieces directly on a lathe. It is mounted on the lathe tool post and drives a grinding wheel at high speed, allowing accurate grinding of cylindrical, tapered, and other suitable surfaces.

Common Uses

The Banka Tool Post Grinding Attachment is widely used for external grinding, cylindrical grinding, taper grinding, tool sharpening, and precision finishing directly on centre lathes and other compatible machines. It is an ideal accessory for machine shops, tool rooms, maintenance departments, production workshops, automotive industries, and precision engineering facilities, where accurate grinding, improved surface finish, reduced setup time, and versatile machine utilization are essential.
