Features

- Precision-engineered Vernier Caliper
- Manufactured from high-quality hardened stainless steel
- Measures outside, inside, depth, and step dimensions
- Precision-ground measuring jaws for accurate readings
- Smooth sliding mechanism for easy operation

- Clearly engraved graduations for easy readability
- Corrosion and wear-resistant construction
- Available in various measuring ranges and resolutions (Model Dependent)
- Lightweight and ergonomic design
- Designed for continuous industrial use

Description

Overview

The Vernier Caliper is a precision measuring instrument designed for accurately measuring outside dimensions, inside dimensions, depths, and step measurements. It features a precision-machined main scale and vernier scale that provide reliable and repeatable measurements for machining, inspection, and quality control applications. Manufactured from high-quality hardened stainless steel, it offers excellent durability, corrosion resistance, and long-term measurement accuracy.

Common Uses

The Banka Vernier Caliper is widely used for measuring shafts, holes, pipes, plates, machine components, fabricated parts, and precision-engineered products during manufacturing, inspection, maintenance, and quality control operations. It is an essential measuring instrument for machine shops, CNC workshops, automotive industries, fabrication units, tool rooms, educational institutes, quality control laboratories, and precision engineering facilities, where high measurement accuracy, consistent inspection, and reliable dimensional verification are essential for producing quality components.
