Description

Overview

The Vertical Sliding Table is a precision machine-tool accessory designed to provide controlled vertical movement for workpieces, fixtures, and machining accessories. It enables accurate height adjustment and positioning during milling, drilling, slotting, tapping, and other machining operations. Its rigid construction and precision-machined guideways provide smooth movement, excellent stability, and reliable positioning.

Common Uses

The Banka Vertical Sliding Table is widely used for accurate vertical positioning and height adjustment of workpieces, fixtures, and machining accessories during milling, drilling, slotting, tapping, and precision machining operations. It is an essential machine accessory for milling machines, drilling machines, bench machines, tool rooms, fabrication workshops, maintenance departments, educational institutes, and precision engineering facilities, where smooth vertical movement, accurate positioning, and stable workholding are essential for achieving precise machining results.
